TEACHER'S

Teacher Notes

PART A Multiplication Problems 1

Question : There are 3 bumper cars. Each car holds 2 people. How many people are there altogether?

= 3 bumper cars x 2 people

= 6 people altogether.

For Homework, students are required to copy the teacher's notes above, to reinforce the concepts learned in the lesson:

Teacher Notes

PART B Addition Problems 1

Question : Trisha starts with 23 cards. She gets 76 more from Lauren. How many cards does Trisha end up with?

Keyword **MORE** = addition

$$23 + 76 = 99$$

∴ Trisha has

99 cards altogether

For Homework, students are required to copy the teacher's notes above, to reinforce the concepts learned in the lesson:

PART A

Examples

PART B

Examples

1. There are 4 flower pots. Each pot holds 3 roses. How many roses are there altogether?

$$4 \times 3 = 12$$

2. There are 8 bumper cars. Each car holds 4 people. How many people are there altogether?

$$8 \times 4 = 32$$

3. There are 6 racing cars. Each car holds 5 people. How many people are there altogether?

$$6 \times 5 = 30$$

4. There are 12 monster cars. Each car holds 10 passengers. How many passengers are there altogether?

$$12 \times 10 = 120$$

Examples

1. Janice starts with 12 chocolate blocks. Jerry gives Janice 45 more. How many chocolate blocks does Janice end up with?

$$12 + 45 = 57$$

2. If there are 17 raspberries in a box and Benson puts 10 more erasers inside, how many raspberries are in the box?

$$17 + 10 = 27$$

3. Sandy starts with 25 Skittles. Alicia gives Sandy 50 more. How many Skittles does Sandy end up with?

$$25 + 50 = 75$$

4. If there are 44 pencils in a box and Peter puts 34 more pencils inside, how many pencils are in the box?

$$44 + 34 = 78$$

Testing Understanding

1. There are 9 baby cars. Each car holds 4 babies. How many babies are there altogether?

$$9 \times 4 = 36$$

2. There are 11 bumper cars. Each car holds 8 people. How many people are there altogether?

$$11 \times 8 = 88$$

Testing Understanding

1. Tom starts with 38 cookies. Jerry gives Tom 11 more. How many cookies does Tom end up with?

$$38 + 11 = 49$$

2. If there are 70 pens in a box and Bob puts 9 more pens inside, how many pens are in the box?

$$70 + 9 = 79$$

Part A

Part B

1. There are 10 monster trucks. Each truck holds 12 people. How many people are there altogether?

$$10 \times 12 = 120$$

2. There are 8 horse carriages. Each carriage holds 3 people. How many people are there altogether?

$$8 \times 3 = 24$$

3. There are 3 horses. Each horse hold 2 jockeys. How many jockeys are there altogether?

$$3 \times 2 = 6$$

4. There are 11 bumper cars. Each car holds 4 people. How many people are there altogether?

$$11 \times 4 = 44$$

5. There are 9 speed cars. Each car holds 5 people. How many people are there altogether?

$$9 \times 5 = 45$$

6. There are 6 delivery trucks. Each truck holds 12 people. How many people are there altogether?

$$6 \times 12 = 72$$

7. There are 8 tricycles. Each tricycles holds 3 people. How many people are there altogether?

$$8 \times 3 = 24$$

8. There are 2 monster trucks. Each truck holds 2 people. How many people are there altogether?

$$2 \times 2 = 4$$

9. There are 12 racing cars. Each car holds 2 people. How many people are there altogether?

$$12 \times 2 = 24$$

10. There are 8 pumpkin carriages. Each carriage holds 11 people. How many people are there altogether?

$$8 \times 11 = 88$$

1. Andrea starts with 39 candies. Aaron gives Andrea 10 more. How many candies does Andrea end up with?

$$39 + 10 = 49$$

2. If there are 16 rulers in a box and James puts 12 more rulers inside, how many erasers are in the box?

$$16 + 12 = 28$$

3. Jacky starts with 80 lolly pops. Joseph gives Jacky 12 more. How many lolly pops does Jacky end up with?

$$80 + 12 = 92$$

4. If there are 70 erasers in a box and Patrick puts 10 more erasers inside, how many erasers are in the box?

$$70 + 10 = 80$$

5. Nathan starts with 12 Skittles. Jason gives Nathan 12 more. How many Skittles does Nathan end up with?

$$12 + 12 = 24$$

6. If there are 14 erasers in a box and Kenny puts 50 more erasers inside, how many erasers are in the box?

$$14 + 50 = 64$$

7. Cindy starts with 30 strawberries. Jason gives Cindy 30 more. How many strawberries does Cindy end up with?

$$30 + 30 = 60$$

8. If there are 24 rice bubbles in a box and Edward puts 20 more rice bubbles inside, how many erasers are in the box?

$$24 + 20 = 44$$

9. Sharon starts with 30 scissors. Jason gives Sharon 32 more. How many scissors does Sharon end up with?

$$30 + 32 = 62$$

10. If there are 42 erasers in a box and Bill puts 14 more erasers inside, how many erasers are in the box?

$$42 + 14 = 56$$
